USER MANUAL

BCPBPD23

## **GENERAL INFORMATION**

The BCPBPD23 is a 30,000mAh Lithium-Polymer power bank that supports up to 22.5W fast charging function, (PD3.0 and Quick Charge 3.0). You can quickly charge your mobile phone and have enough power left to charge other devices. It also has a functional flashlight to help you in certain situations. This power bank can charge up to three devices simultaneously.

## **CHARGING THE POWER BANK**

- Before using the wireless power bank for the first time, please charge the power bank fully. We recommend a USB Adapter that supports 5V/3A to charge through the Type-C USB interface. USB Adapter is not included.
- To utilize the fast-charging feature, it is recommended to use a PD3.0 charger that supports 9V/2A or 12V/1.5A to quickly charge through the Type-C USB interface. A green lightning indicator will light up next to the battery level indicator.

## **CHARGING YOUR MOBILE DEVICE WITH THE POWER BANK**

- Use the Type-A USB port that supports QC3.0 through 9V/2A or 12V/1.5A, maximum of 18W to charge your devices quickly (requires the device to support QC3.0).
- Use the Type-C USB port that supports PD3.0 through 9V/2A or 12V/1.5A, maximum of 20W to charge your devices quickly (requires the device to support PD3.0).
- The Type-A USB port also supports 5V/4.5A, max 22.5W SCP to quickly charge HUAWEI mobile phones (the HUAWEI mobile phone needs to support SCP and use the original HUAWEI charging cable)
- When multiple mobile phones are connected at the same time, the output will be automatically adjusted for 5V output.
- This power bank supports the function of charging and discharging, and the output will be automatically adjusted to 5V output when charging and discharging.

## **LCD DISPLAY/BATTERY LEVEL**

- This power bank has a digital LCD display that shows battery level from 0% - 100%. When it shows 0% and flashing, this means that the power bank needs to be charged.

## **BUTTON FUNCTIONS**

- Press the power button to display the check the battery level percentage.
- Press the power button twice to turn-off the battery display.
- Press and hold the power button for 3 seconds to turn-on the LED flashlight and hold the button for 3 seconds again to turn it off.

# PRODUCT DETAILS

## **IMPORTANT SAFETY PRECAUTIONS:**

Please note the following precautions before initial use. Failure to comply may be dangerous and cause damage to your mobile devices.

- If the Power Bank does not respond once it is powered on, the battery level may be low. Follow the instructions for charging the Power Bank and check the LED battery capacity indicator. The indicator will flash as the Power Bank begins charging.
- Charge the power bank fully before initial use. The unit only achieves maximum performance after 2 or 3 full charging and discharging cycles.
- Always recharge the power bank in a well-ventilated area. Do not leave the power bank in hot or cold places.
- Do not immerse the power bank in water or expose it to moisture or weather conditions.
- Do not drop, knock, or shake the power bank. Rough handling can damage the internal precision component and its board.
- Keep the power bank away from children; this device is not a toy. While charging, the power bank's casing may become warm, which is normal as the charging and discharging processes generate heat.
- Keep the power bank away from fire or other sources of heat.

- Exposing the power bank to high temperatures may cause it to explode.
- Do not short-circuit the power bank, as this may cause damage to the unit.
- Unauthorized changes or modifications may void your right to use this product.
- While using the power bank, always comply with any special regulations that may apply to the area you are in and always turn off your mobile device when its use is prohibited. For example: do not use the power bank during flight, takeoff or landing, near medical equipment, as it may cause interference or damage

## **MULTI-SAFETY PROTECTION**

1. **Over-charge Protection** - Detects the state of the battery and stops the charging process when the power bank is at 100%.
2. **Short circuit Protection** - Disables discharging if a short circuit is detected.
3. **Over-Voltage Protection** - Disables charging when the battery voltage goes above a safe threshold.
4. **Over-Current Protection** - Disables charging when the battery current goes above a safe threshold.
5. **Over-Discharge protection** - Disables discharging when the battery voltages goes below a threshold.

## **SPECIFICATIONS:**

Battery Capacity 30000mAh

Micro-USB Input: 5V/2A 9V/2A 12V/1.5A

Type C Input: 5V/3A 9V/2A 12V/1.5A

Type C Output: 5V/3A 9V/2.2A 12V/1.67A

USB Output: 4.5V/5A 5V/3A 9V/2A 12V/1.5A

Max Power: 22.5W

PD 3.0: Support

QC 3.0: Support

Material: Aluminum

Colour: Black

Product Weight: 579 grams

Product Size: 144\*39.2\*67.1mm

## **PACKING LIST:**

1x Power Bank

1x USB Type-C Charging Cable

1x User Manual
